PROFESSIONAL SUMMARY

RPA Developer with over 4 years of experience in technology and a degree in Information Technology Management (UniCuritiba). Specialized in process automation with Python, C#, Selenium, Playwright and Power Automate Desktop, working across the entire solution lifecycle — from requirements gathering and architecture to deployment and production support. Experienced in system integrations through REST APIs, automated document generation and processing (PDF and Word), data extraction and transformation, dashboards and management indicators, Artificial Intelligence (OpenAI API) applied to business processes and relational databases (MySQL and SQL Server). Track record of bots and systems that reduce manual work, increase productivity and make operations more reliable.

PROFESSIONAL EXPERIENCE

Plenna Comércio Exterior — Curitiba, Brazil

Apr/2026 – Present

RPA Developer | Mid-level

- Development of automation bots (RPA) with Python, C#, Playwright and Selenium for foreign trade processes and administrative routines.
- Automation of document generation and processing, data extraction and transformation.
- Creation and maintenance of internal systems, web applications and websites.
- System integration through APIs and external services.
- Deployment, publishing and support of bots and applications in production.
- Server management, system and data migration and cloud management (Microsoft Azure).

Estalk Advogados (law firm) — Curitiba, Brazil

Jul/2024 – Present

RPA Developer | Mid-level

Feb/2026 – Present

- Development of bots and applications with Python, C#, Power Automate Desktop, Selenium, Playwright and Artificial Intelligence, automating legal and administrative processes.
- Responsible for the entire solution lifecycle — from requirements gathering and architecture to deployment and maintenance in production.
- System integration through APIs, including legal systems (CPJ, XJUS and Preâmbulo).
- Automated document generation and processing (PDF and Word) and data extraction and transformation.
- Development of web applications with Python (Flask), REST APIs and relational databases.
- Dashboards and indicators (KPIs), database modeling and optimization.
- Artificial Intelligence (OpenAI API) applied to business processes.

RPA Developer | Junior

Jul/2024 – Feb/2026

- Creation of bots with Python, Selenium and Power Automate: web automations, automatic document generation, data processing and information integration across platforms.
- Backend development with Python (Flask), web interfaces and MySQL database modeling.
- System integrations through APIs.
- Involvement in every stage: needs analysis, implementation, testing and maintenance.

Court of Justice of the State of Paraná (TJPR) — Curitiba, Brazil

May/2023 – Jul/2024

IT Intern

- Technical support for users and maintenance of computers, peripherals and printers.
- Infrastructure support: networks, switches, extensions and corporate telephony.

SpaceSet — Curitiba, Brazil

Aug/2021 – Sep/2022

IT Analyst

- Technical support, systems maintenance and IT infrastructure management.
- Administration of corporate systems and implementation of technology improvements.

FEATURED PROJECTS

Legal Automation (RPA)

Bots to automate legal tasks: issuing judicial release orders, generating court fee slips, judicial calculations, initial pleadings and controllership routines.

Python · Selenium · Playwright · RPA

System Integration Bots

Automations responsible for claim intake, importing and exporting data between corporate systems and automated information processing.

Python · C# · REST APIs

Automation Management Platform

Internal system to register, monitor and manage the company's multiple bots and automated processes.

Python · RPA · Dashboards

Smart Legal Document Generator

System that analyzes case files (PDF and DOCX) and automatically drafts legal documents with AI integration.

Python · Flask · OpenAI

Legal Analysis System

Corporate web platform for the full management of legal analyses, with multiple user levels (lawyers, supervisors and board members), automatic document generation and analytics dashboards.

Python · Flask · JavaScript · MySQL

TECHNICAL SKILLS

Automation & RPA	Selenium, Playwright, Power Automate Desktop, Web Scraping, bot orchestration
Languages	Python, C#, SQL, JavaScript, TypeScript, Java, VBA
Backend & APIs	Flask, Node.js, REST APIs, integrations between corporate systems
Artificial Intelligence	Integration with AI APIs (OpenAI) applied to automations and business processes
Databases	MySQL, SQL Server and SQLite — data modeling and query optimization
Data & Documents	Power BI, advanced Excel (VBA), PDF, Word and Excel generation with Python
Web Development	HTML, CSS, Bootstrap, React, Angular
DevOps & Cloud	Git, GitHub, application deployment, Microsoft Azure

EDUCATION

Information Technology Management — UniCuritiba

2023 – 2025

COURSES & CERTIFICATIONS

C# — DankiCode (2026)	Complete Front-End Webmaster — DankiCode (2025)
Node.js — DankiCode (2026)	React Native — DankiCode (2025)
Artificial Intelligence — DankiCode (2026)	Microsoft Azure — Microsoft (2022)
DevOps Essential — DankiCode (2026)	Office 365 Suite — Educavy (2022)
Complete Python — DankiCode (2025)	

LANGUAGES

Portuguese — native · English — intermediate

VOLUNTEER WORK

Volunteer scout for 12 years — ongoing work in team leadership, activity organization and youth development; skills applied directly to project management and teamwork.
